

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

The present list, the seventh of this Library's bibliographical publications, is chiefly intended as a guide to the books exhibited during the meetings of the American Association for the Advancement of Science and the Bibliographical Society of America, December 30, 1907, to January 4, 1908. The second part of the list contains a small number of the Library's most valuable and interesting books in various subjects. The first part is composed exclusively of early printed books in the medical collection formed by Dr. Nicholas Senn of Chicago, donated by him to the Newberry Library and recently transferred, with his consent, to this Library; it contains all the incunabula, sixteen in number, including the *REGIMEN SANITATIS SALERNITANUM* of doubtful date, but believed to have been printed in the year 1500, and the major part of the books printed during the first half of the sixteenth century. Many of these books are of interest on account of their personal associations, as having formerly belonged to well known medical scholars, such as François Quinquaboef, J. S. Henninger, Johannes Boecler, Georg Walther, in addition to those whose ex-libris are mentioned in the text; nearly all of them belonged to the library of Professor Wilhelm Baum in Göttingen, and contain historical and bibliographical notes from his hand. Not a few of the volumes are notable for their bindings, though these in too many cases have not been well preserved. No description of the bindings, nor any investigation of the manuscript notes found in many of the books, has been attempted; nor has it been possible, in the time at command, to make more than summary notes of the illustrations, which are remarkable features, especially in many of the books dealing with surgery. To the short time in which the list has to be prepared should also be charged such inconsistencies and other inadvertencies as may remain in spite of all efforts to eradicate them. Needed alterations will be made in the complete list of the 15th and 16th century books in the Senn Collection, which is in course of preparation though it may not be issued for some time. Inconsistencies in the second part are due to the fact that changes in the cataloguing rules of the Library have been made from time to time, while it has not always seemed necessary to alter the electrotypes for the earlier material.

REGULATIONS

The Library is open to readers every day, excepting Sundays, from 9 a. m. to 10 p. m.

Outer garments, umbrellas, and packages may be checked in the Cloak Room without charge, and must be so checked in wet weather. The Library will not hold itself responsible for unchecked articles nor for any articles left over night.

Books shelved in the Reading Room may be consulted without formality, but after use are to be left on tables, instead of being replaced on the shelves.

Current periodicals may be consulted within the periodical alcove; and may be obtained for use at the tables in the Reading Room by presenting to the Periodical Clerk a serial call-slip properly filled out.

Books not shelved in the Reading Room may be obtained by presenting to the Delivery Clerk a book call-slip properly filled out. These books are to be returned to the delivery desk.

Persons engaged in special research, if satisfactorily vouched for, may be admitted to the Stack Rooms. Application for this privilege should be made to the Reference Librarian. All books used under this provision are to be left on the tables in the Stack Rooms.

Books not suitable for general use may be consulted only upon registration and statement of satisfactory reasons; and those of great value or rarity only in the presence of an attendant.

Writing or marking in books belonging to the Library, or their mutilation in any manner, is forbidden. The tracing of plans will be permitted if done over a celluloid cover, but not otherwise. The covers will be furnished upon application at the delivery desk.

The officials of the Library are authorized to exclude any person of unseemly behavior or appearance, and any one wilfully violating its regulations.

The Reference Librarians, in charge of the Reading Rooms, will give assistance in the use of the Library.
